

The Haverford Math Department Presents

Puzzle Week 2026

Monday, May 18 - Tuesday, May 26, 2026

- This packet contains 7 puzzles. The first 6 puzzles are independent of one another. The final puzzle is a metapuzzle: it requires the answers from the other 6 puzzles in order to solve it.
- The answer to each puzzle is a single word, name, or short phrase in English.
- You may use the internet and any other resources at your disposal.
- The puzzles are designed to be collaborative. Work alone or form a team of 2 - 5 friends, colleagues, classmates, teachers, etc. to solve the puzzles. Do NOT share answers with other teams.
- Each participant (whether working solo or on a team) should register at puzzleweek.abrastat.com.
- Submit your answers at puzzleweek.abrastat.com by 23:59 on Tuesday, May 26, 2026.
- Complete at least one puzzle to earn your Puzzle Week certificate. Complete them all for a Gold certificate!
- Answers will be revealed at the end of Puzzle Week.
- Have fun and good luck!

Day 1: Trading Car[d]s

*Ugh I knew I shouldn't have bought trading cards off that sketchy website. Maybe if I put the room numbers all together **they'll** add up to something...*

Day 6: Mischief Managed

A student working in the main office found this letter in the suggestion box and removed it before Mr. Donaghy saw it. The student wants to figure out who the tattletale is. Here is the letter:

Dear Mr. Donaghy,

I have information concerning planned mischief. Four students in four different Years are planning to carry out four different Pranks in four different Locations based on four different Motives.

Without revealing my own identity, I'm giving you the following clues which will be sufficient for you to catch them in the act and take appropriate disciplinary action.

- 1. The student planning **Shenanigans** is not an upperclassman.*
- 2. **Abigail** is planning **Monkey Business**.*
- 3. The student who **Lost a Bet** is a **Senior** planning **Hijinks**.*
- 4. The Freshman is not motivated by a **Crush** or by having been **Picked Last**.*
- 5. The student in the **Library** is not motivated by having **Lost a Bet** or a **Dare**.*
- 6. The student with a **Crush** will not be found in the **Auditorium, Gym, or Library**.*
- 7. **Daisy** is not a **Sophomore** or a **Junior**.*
- 8. **Clive** is at least one year ahead of the student who was **Picked Last**.*
- 9. The student in the **Library** is at least one year ahead of the student in the **Science Lab**.*
- 10. **Brandon** is not planning **Horseplay**.*
- 11. The student in the **Gym** is not planning **Hijinks**.*
- 12. The student who **Lost a Bet** is at least one year ahead of **Daisy**.*

Regards,

MetaPuzzle: Graph of the (Day, ?)

Instead of naming constellations by imagining connecting stars to form shapes, a student in Mr. Bilotti's class plots groups of stars as points on a graph and uses the points to name the constellation using the answers to the first six puzzles. It doesn't look like it at all, but this one is called _ _ _ _ _.
